Construction activities scheduled to begin May 23

Plymouth City Council awarded the contract for the Kilmer Park Street Reconstruction Project May 8 to GMH Asphalt Corporation. As the general contractor for the project, GMH Asphalt has indicated it plans to begin construction activities Wednesday, May 23, beginning with the storm sewer installation in Phase A (see map). Once construction is nearing completion in one phase, the contractor will start construction activities in the next phase.

Phase A Temporary Closures: The utility work in Phase A will require temporary closures of Kilmer Lane from 27th to 25th avenues, as well as the intersection of 26th Avenue and Kilmer Lane. The Highway 169 off-ramp to Kilmer Lane and the southbound Highway 169 on-ramp will be closed and detoured as well. Construction signage containing the closure information will be posted.

Tree Removal: Prior to beginning the project, the contractor must remove some trees within the project area on Friday, May 25 – those trees will have been marked for removal by Monday, May 21. If you have questions or concerns about trees marked for removal, please contact the project inspector.

Landscaping, sprinklers, mailboxes and project access

Construction in the right-of-way: Please note that items located in the city right-of-way – typically 10 to 15 feet beyond the edge of the pavement – could be impacted during construction. Typical construction limits extend a minimum of five feet behind the current edge of pavement, but may extend to 10 feet on some properties. In addition, areas within 10 feet of a water curb stop or fire hydrant will be impacted.

Landscaping, sprinklers and underground fences: Residents who wish to keep any landscaping in the areas listed above should remove Project access ... continued on page 2 >
**Project access ... from page 1**

these items. Disturbed areas will be restored with sod once construction is complete. Any sprinkler systems or underground dog fences damaged during construction are the contractor’s responsibility to repair. Any assistance residents can provide in marking these items is appreciated.

**Mailboxes:** Prior to construction, the Post Office requires the contractor to remove all mailboxes and create a “bank” of mailboxes at a central location. The bank of mailboxes will be tentatively located near the intersection of Kilmer Lane and 27th Avenue. Residents will be notified about the location one week prior.

**Driveway access:** Residents will have access to their driveways at the end of each day, but there may be periods during the day where driveway access will be limited. We appreciate your patience during this process.

**Project contacts**

Residents with questions or concerns should first contact the city’s project inspector before reaching out to other contacts.

**Project inspector**, City of Plymouth: Tony Moening, 763-509-5545 or tmoening@plymouthmn.gov

**Project manager**, City of Plymouth: Mike Payne, 763-509-5538 or mpayne@plymouthmn.gov

**Contractor:** GMH Asphalt Corporation, 952-442-5288

**After-hours emergencies:** 911

**Utility Companies**

- **CenterPoint Energy** Customer Service Office: 612-372-4727
- **Xcel Energy** Customer Service Office: 1-800-895-4999
- **Comcast** Customer Service Office: 1-800-934-6489
- **CenturyLink** Customer Service Office: 1-877-837-5738

**Safety is our number one priority**

Please remember that construction sites can be very dangerous places. Heavy equipment will be utilized in the project area and paving operations will place blacktop at temperatures in excess of 300 degrees. We realize that both children and adults may wish to watch the construction activity, but please make sure that everyone is keeping a safe distance. Remember – safety first.
